HIV/AIDS, Behavioral Health Care and Employment: Panel

Ilze Linda Ruditis, MSW, CAPT, USPHS, HHS/SAMHSA/Center for Mental Health Services

David Martin, Ph.D. American Psychological Association

Yavar Moghimi, MD, American Psychiatric Association

Evelyn Tomaszewski, MSW, National Association of Social Workers
Sec. 4. Other Agency Responsibilities.

   (b) Equal Employment Opportunity Commission (Commission). Within 100 days of the date of this order, the Chair of the Commission shall submit to ONAP and OMB recommendations for increasing employment opportunities for people living with HIV and a plan for addressing employment-related discrimination against people living with HIV, consistent with the Commission’s authorities and other applicable law.

Why Behavioral Health Care?

Behavioral health disorders are not ‘uncommon’:

**SAMHSA, National Survey on Drug Use and Health, 2013:**
- 20.3 million adults had a substance use disorder in the past year.
- Of these, almost 40% (37.8% or 36.2 million people) had a co-occurring mental illness.
- 43.8 million people who had a mental disorder, 17.5% also had a substance use disorder.

Why Behavioral Health Care?

Over 1.2 Million People with HIV/AIDS in the US 2012
- Estimated, 158,300 (12%) not yet diagnosed.

The most frequent behavioral health disorder among people with HIV is *depression*.
[http://aidsinfonet.org/fact_sheets/view/558](http://aidsinfonet.org/fact_sheets/view/558)

*Discrimination and stigma can* impact mental health, adjustment to HIV/AIDS, adherence to care, and prevention.
Why Behavioral Health Care?

*Behavioral health disorders as well as HIV associated with*

- Sexual risk, poor judgment, unstable housing and unemployment – impact treatment and prevention

*HIV and Care*

- Cofactors such as TB, malnutrition, poverty, trauma, intimate partner violence, not only sexual and drug infection routes, increase disease burden and can interrupt likelihood of optimal HIV treatment and prevention.

HIV, Mental Health and Employment

- Being employed was significant for both physical and mental health quality of life for men and women with HIV. (Sergio Rueda, Ontario HIV Treatment Network, University of Toronto) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3654507/, retrieved on line 08/25/2015, published online 2012 Oct 1.

- Employed men with secure jobs reported significantly higher mental health. (Sergio Rueda, Ontario HIV Treatment Network, University of Toronto) http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3654507/, retrieved on line 08/25/2015, published online 2012 Oct 1.

- Up to 45% of people with HIV are unemployed. (Rabkin, McElhiney, Ferrando, Van Gorp, & Lin, 2004).

- Those unable to work because of disability were more likely to receive mental health services than were those in other employment categories. Rand Research Brief RB 9300. http://www.rand.org/pubs/research_reports/RR407.htm
SAMHSA has demonstrated treatment works and recovery is possible.
2014, Seven (7) States awarded grants to build supported employment services
- Alabama, Connecticut, Illinois, Kansas, Ohio, Utah, Washington
- Maryland recently expanded supported employment statewide.

- Expected outcomes:
- maintain and expand supported employment services throughout the state and
- increase the number of individuals with serious mental illness and co-occurring mental and substance use disorders who obtain and retain competitive employment. (SAMHSA GRANTS, RFA SM-14-011)
Achieving Sustained Competitive Employment Is Possible

• **Supported Employment Programs** - Evidence based program models combine key elements:

  - Support healthy living so that the individual can consistently work
  - Address behavioral health barriers
  - Address criminal justice involvement concerns
  - Build resume and interviewing skills
  - Job development – identify prospective employers who will participate
  - Job coaching – ongoing problem solving and strength building
Financing of Supported Employment Programs (SEP)

States frequently are found to have some form of SEP- often use **Braided Funding** with...

- **Vocational Rehabilitation**
- **State’s Dept(s) for Behavioral Health**
- **Medicaid Increasingly Can Help Funding**
  - Expansion States
  - Newer Medicaid Plan Designs and Waiver Options
    - * Health Homes *
    - * Rehabilitation Benefits *
    - * Multiple Chronic Conditions
Supported Employment Toolkit-

SAMHSA’ Minority AIDS Initiative Continuum of Care Pilot Grant Program (MAI-CoC) - RFA-ti-14-013

– Grants for services and prevention integrate and collocate HIV and hepatitis care into behavioral health care programs, and... Requirements include vocational, educational support:

• Providing “wrap-around”/recovery support services (e.g., child care, vocational, educational and transportation services) designed to improve access and retention.
HIV / AIDS & Mental Health
upcoming - Training and Resources

HIV / AIDS & Mental Health Training & Resource Center

Welcome to the HIV/AIDS & Mental Health Training Resource Center. Our goal is to expand the knowledge and capacity of mental health care providers to address the mental health and psychosocial needs of consumers impacted and affected by HIV. We offer resources for psychologists, psychiatrists, social workers, and allied health professionals through the online Training Institute, news and resources, and in-person trainings at regional and national conferences and workshops.

Institute on HIV & Employment
Join us at the National Working Positive Coalition’s free full-day Institute on HIV & Employment.

Wednesday, September 9, preceding the U.S. Conference on AIDS in Washington, DC.

Details and Free Registration Info

Training Institute
An ever-expanding array of training resources including practice briefs, videos, webinars, and curated resource links.
